Practical exercise: step by step creation of a website

🔒 Log in or subscribe for free to enjoy all this course has to offer!

So finally, here we are. This chapter is somewhat special and fairly different from what you've read so far. In fact, it's a practical exercise. You can now no longer simply read my chapters half asleep, you'll have to get your hands dirty at the same time as me.

Although you've read a lot of theory so far, you're probably wondering how webmasters actually create such attractive websites. You're saying to yourself that you are still a long way from having the knowledge needed to build a whole website... Well, you're wrong!

Drafting the design ›

Organizing the content in HTML ›

Formatting in CSS ›

Ensuring compatibility with IE ›

Checking the validity ›

## The final code ›

< POSITIONING IN CSS   QUIZ: QUIZ 3 >

Teachers

Mathieu Nebra

Entrepreneur à plein temps, auteur à plein temps et co-fondateur d'OpenClassrooms :o)

Emily Reese

Emily's from New York City and lives in Paris, France. She's a web developer (formerly at Kickstarter), teacher at OpenClassrooms, and more!
